How to use this sheet

Step	What to do
1. Upload to Drive	Upload the website folder to Google Drive, keeping the same Clients logos / Case studies structure.
2. Get share link per file	Right-click a file in Drive → Share → 'Anyone with the link' → Copy link.
3. Paste into the sheet	Paste each link in the Drive Link column next to the matching file name.
4. Bulk option	If you have many files, install a Drive add-on like 'Get Links' or use a Google Apps Script to auto-fill the link column by matching file names.
5. Convert to Google Sheet	Upload this .xlsx to Drive, right-click → Open with → Google Sheets, then File → Save as Google Sheets.

Bonus: bulk-link Apps Script

Open your Google Sheet → Extensions → Apps Script. Paste a script that reads file names from column B and fills column C with the matching Drive file URL by searching a folder ID. This turns 37 manual paste actions into one button click.
